

CITY OF
ANDERSON

June 10, 2009

Mr. Tom Gregory
TRG Equipment Services and Excavation
P.O. Box 2227
Cottonwood, CA 96022

Dear Mr. Gregory:

The following letter is in appreciation and recognition of the excellent work performed by you and the TRG employee's at the Church on the Rock expansion project.

The Church on the Rock project is the first project in the City using the Storm Tech detention system. Your ability to work with the manufacture, the engineer and the owner to provide a successful installation, in a tight and confined area, with no disturbance to the surrounding neighbors was impressive. The actions that you took, went above and beyond, to problem solve and bring solutions forward when unforeseen issues occurred. The manner in which you were able to dewater and continue the project forward with no delays is a good example of how you made the project successful.

In many projects that we see, the attention to detail is lost or lacking. This was never case with the Church on the Rock project. TRG made every effort to make sure the installations of the water, sewer, storm drains, and parking lot were installed to the City Standards or better.

It was a pleasure having TRG Equipment Services work in the City of Anderson and we look forward to having you work on future project in the City.

A handwritten signature in blue ink that reads "Jeff Kiser". The signature is written in a cursive, flowing style.

Jeff Kiser
