To Whom It May Concern:

RE: TRG Equipment Services

The Western Shasta Resource Conservation District has done a number of large and small public works jobs over the years. Tom and Stephenie Gregory of TRG Equipment Services have bid on several of our projects over the last few years and they were the selected bidder on a fish habitat improvement project in Middle Creek this month.

This project had a very short timeframe and several complicating factors including an historic dam which made up one side of the project footprint and truck access to the site from a very busy county road.

We anticipated the project might take several days, but TRG had their equipment staged early and worked steadily to complete the project early. The project went off without a hitch and both Tom and Stephenie are very professional and easy to work with. They are genuinely interested in restoration work and are very careful equipment operators. We have worked with many of the local contractors and TRG Equipment Services are people we would definitely like to continue working with in the future.

Sincerely,

Gail Grifantini
Project Manager
