Subject: TRG Equipment.

Dear BOR Representative:

As the project inspector for the Bend Pipeline project it was my job to be the on the ground person that protects the interests of the government when it came to administering the contract. Working with TRG equipment was the highlight of the season last year, because they made my job easy. TRG Equipment is professional in everything they do and always makes sure that the job is completed to higher standards than what is specified in the contract. They always met timelines and did not ever let quality be sacrificed to meet their goals. Due to their performance on the Bend Pipeline job I would feel comfortable saying that any job that they might do for you would be done to all specifications and be done very professionally. Feel free to call me if you have any questions.

Sincerely,

Shaun Ryon
Engineering Equipment Operator
